### **DETAILED ACTION**

# Response to Amendment

The Amendment, filed on 05/10/2002, has been entered and acknowledged by the Examiner.

## Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-2 and 5-9, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claims 1-2 and 5-9, and specifically comprising the limitation of containing sulfur in the film in a range of not less than 1 mol% and not more than 5 mol% as a ratio to carbon.

Regarding claims 3-4 and 10-11, claims 3-4 and 10-11 are allowable for the reasons given in claims 1-2 and 5-9 because of their dependency status from claims 1-2 and 5-9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Other Prior Art Cited

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nomura et al. (US 5,470,265) discloses the use of pulse voltages on the source.

Art Unit: 2879

Nomura et al. (US 5,578,897) discloses use of an electron source comprising a number of electron sources.

Nishimura et al. (US 6,208,071) discloses the use of electron sources and combinations of those sources to form a system of electron sources.

Nakagawa et al. (US 4,766,477) discloses the use of a carbon and sulfur film for use in semiconductor devices such as thin film transistors.
